

SME Efficiency
Booster
Make your business
more effective
without engaging in
complex IT projects

1 26.07.2023

1

Motivation

Quodara

-  Empower business users to more efficiently work with available data
-  Automate most tedious processes to make users happier and to reduce operational risk
-  Stabilize core to enforce minimum governance in data and application security

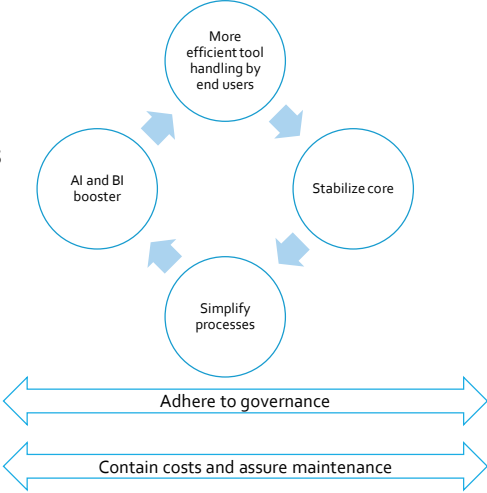

2 8/1/2023 SME booster

2

Quodara

Simple and Stable Approach

-  Benefits can be reaped from the beginning
-  Agile and iterative approach guaranteeing commitment from business and allowing for smooth introduction
-  Pragmatic approach to move functionality to backend only if synergies can be unlocked.
-  No compromises on governance, but also no overdoing.
-  Clear cost management and maximize return on investments

3

Quodara

Concrete Realization

-  Review business users' information sharing and data consumption and suggest ways to improve (Excel, Power BI, Sharepoint, Power Automate).
-  Stabilize core with products that are lightweight in nature and only require minimal setup and maintenance.
-  Review your business process to aim for cross-process alignment and simplification potential
-  Step-up current functionality with the help of out of the box Artificial Intelligence, Analytics and Business Intelligence features
